Education

Shahid Beheshti University

Bachelor of Science in Computer Engineering

Tehran, Iran

Sep. 2020 to Feb. 2025

- **Cumulative GPA: 17.49/20 (3.68/4)**
- **GPA of last two years: 18.32/20 (3.79/4)**

Relevant Courses: GPA: 4/4

- | | | |
|-----------------------------------|---------------------------|------------------------------|
| - Fundamentals of Computer Vision | - Machine Learning | - Computer Simulation |
| - Fundamentals of Robotics | - Artificial Intelligence | - Statistics and Probability |
| - Deep Reinforcement Learning | - Algorithms Design | - Data Structures |

Farzanegan 1 Secondary School

High School Diploma in Mathematics

Mashhad, Iran

Sep. 2017 to Jun. 2020

- **Diploma GPA: 19.98/20 (4.0/4.0)**

Work Experience

Network Security Assistant

Dotin

Tehran, Iran

Jun. 2023 - Oct. 2023

- Management of access levels for company members in various departments to available resources and information in each section by utilizing Windows Azure, as well as identifying and analyzing potential weakness and breaches in the network.

Network Security Intern

Dotin School

Tehran, Iran

Jan. 2023 - Jun. 2023

- Internship at Dotin school bootcamp for network security.
- Learned about different types of security vulnerabilities, how to identify risks, respond to incidents, and perform penetration testing.

AI Engineer

Amoot

Mashhad, Iran

Jan. 2026 - present

- Developing phishing detection systems, contributing to the development of a comprehensive AI assistant, fine-tuned for Farsi.

Research Experience

B.Sc Thesis

IMAGE PROCESSING AND DISTRIBUTED SYSTEMS LAB

Shahid Beheshti University

in preparation

- Proposing a Dynamic Attentive Graph Neural Network for Cardiac MRI Reconstruction in a cascading manner.
- Under Supervision of Dr. Mohsen Ebrahimi Moghaddam.

Honors and Awards

2025 Placed Among 10 outstanding undergraduate students studying computer engineering, Shahid Beheshti University.

2020 Ranked 2nd among 90 in admission among accepted students in the Computer Engineering department, Shahid Beheshti University

2020 Ranked 321st in National entrance exam for B.Sc Studies among 160,000 students.

2017 Ranked 1st in National Organization for Development of Exceptional Talents Secondary School Entrance Exam in Khorasan Razavi Province.

Projects

DAGMRNet: Dynamic Attentive Graph Learning for Cardiac MRI Reconstruction Feb. 2025

[Link to GitHub Repository](#)

- A Dynamic Attentive GNN model for Reconstruction of highly under-sampled Cardiac MRI images of CMRxRecon Dataset is proposed.
- The proposed model reconstructs under-sampled cardiac MRI images by leveraging both spatial and temporal relationships in the data according to self-similarity image prior. The model utilizes a PromptUnet, a U-Net enhanced with prompt and attention blocks, introduced by PromptMR framework for sensitivity map estimation.

Automated Stock Trading Strategy with DRL

Jun. 2024

[Link to GitHub Repository](#)

- Designed a Cascading Long Short-Term Memory Proximal Policy Optimization (PPO) model which uses LSTM layers to capture temporal dependencies in stock data and a PPO algorithm to optimize trading decisions.
- The environment is from yfinance library with trading data from Jan. 2009 up to Jun. 2024.

Enhanced Farsi News Classification

Mar. 2024

[Link to GitHub Repository](#)

- The goal of this project is to develop an enhanced neural network model to classify Farsi news articles into their respective categories.
- The dataset has been preprocessed with Tokenization and Feature Extraction.

Guidance of a Quadcopter for Object Detection

Mar. 2024

[Link to GitHub Repository](#)

- Designed a controller for a quadcopter to control its flight over boxes in an urban environment, automatically taking precise images of boxes and interpreting the images using Computer Vision Deep Learning-Based Approaches.
- After interpreting the image, the quadcopter determines whether the item matches the target item; if matched, the quadcopter lands beside the box and turns on its front LEDs.

Bug Algorithms

Jan. 2024

[Link to GitHub Repository](#)

- Implementation of Bug1, Bug2, and Wall-following algorithms for GCTronic's e-puck in the Webots environment.
- Each algorithm successfully guides the robot through a maze.
- Map of the maze is generated with Bug2 and split-and-merge algorithms.

Tron Game Agent

May. 2023

[Link to GitHub Repository](#)

- The algorithm devised for this game is a combination of a Genetic Algorithm and Minmax, where Minmax is used as the fitness function for the Genetic Algorithm.
- This game consists of two real-time agents that try to create more walls than their opponent while avoiding collisions with each other and the boundary walls. The Unity framework used is based on Chillin's monitor games.

Certificates and Workshops

2025 Unsupervised Learning, Recommenders, and Reinforcement Learning, DeepLearning.AI

2025 Advanced Learning Algorithms, DeepLearning.AI

2023 Supervised Machine Learning: Regression and Classification, DeepLearning.AI

2023 Building Web Applications in Django, University of Michigan

2023 Web Application Technologies and Django, University of Michigan

2023 Excel Basics for Data Analysis, IBM

2023 Introduction to Back-End Development, Meta

2020 Ranked 1st in second national Cyber Security and Cryptography Competition, Ferdowsi University of Mashhad

2019 Ranked 1st in first national Cyber Security and Cryptography Competition, Ferdowsi University of Mashhad

2018 Certificate of Excellence for outstanding performance in Students' Vision on Vision Books Conference, SAMPAD

2018 15th National Mathematics Conference - Reza Sadeghi, SAMPAD

Teaching Assistant Experience

Discrete Mathematics

Sep. 2024 - Feb. 2025

- Lectured by: Dr. Farshad Safaei

Algorithms Design

Sep. 2024 - Feb. 2025

- Lectured by: Dr. Ramak Ghavamizadeh

Software Engineering

Feb. 2024 - Jul. 2024

- Lectured by: Dr. Mehran Alidoostnia

Technical English

Sep. 2023 - Jul. 2024

- Lectured by: Dr. Vahidi Asl

Computer Architecture

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Rahmati

Advanced Programming

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Vahidi Asl

Artificial Intelligence

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Mehrnoush Shamsfard

Compiler Design

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Mehran Alidoostnia

Computational Intelligence

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Shahabedin Nabavi

Operating Systems Laboratory

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Shahabedin Navabi

Statistic and Probability

Sep. 2023 - Jan. 2024

- Lectured by: Dr. Farshad Safaei
